

Technical Specification

Type: Ice Maker

FPE's new FIM Ice Maker has been designed and built to exacting specifications, incorporating many years experience in the food industry.

We have built this machine to be uncompromising in quality yet ensuring it is simple to use, easy to maintain and cost effective.

Utilising the best available manufacturing techniques has enabled us to offer high quality machinery with real **value-for-money** prices in today's market.

SERIES	FIM Ice Maker
MODEL	FIM-100
DESCRIPTION	Ice Flakes

The FIM-100 Ice Maker produces up to 100 kg of ice flakes per hour. It will produce ice flakes of various shapes, with thicknesses ranging from 1.0 to 2.0 mm.

The FIM-100 has a modern design, incorporating a Stainless Steel body and the latest technology in air-cooled compressors to ensure flawless refrigeration and low energy consumption.

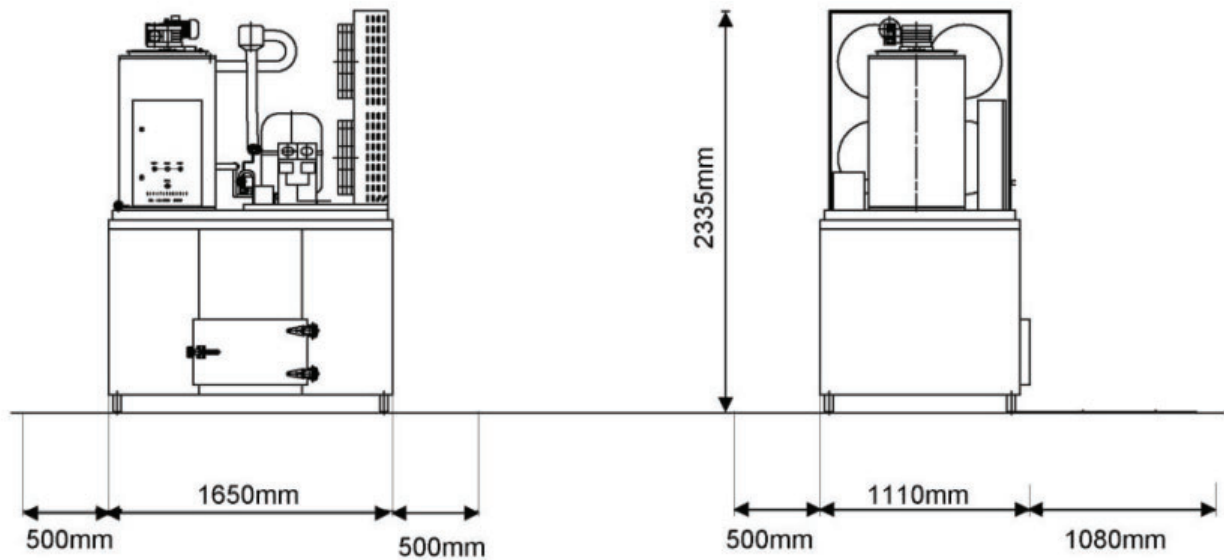

The machine is suitable for a number of applications, including cooling and water addition in sausage and continental meat production, ice for display purposes and also ice flakes for dessert production.

The FIM-100 can be tailored to customer's specific requirements, including electrical components and software integration.

MODEL	FIM-100
CAPACITY	Up to 100 kg/hour
ICE THICKNESS	1.0 ~ 2.0 mm
POWER	9 kW
ROLLER SPEED	2 rpm
EXTERNAL DIMENSIONS	1.8 x 1.2 x 2.5 m
WEIGHT	650 kg

FIM-100 external dims. and clear working space required
